The New York Tribune in its market report, explained why some butter it sold for such low prices. In speaking of butter it said, "Light colored goods are hand to dispose of, and several lots were thought well sold at 8 to 10 cents." If butter makers would get the top price, they should use the Perfected Butter Color, made by Wells Richardson & Co., Burlington Vt. It gives a pure dandelion color and is never red, or rangid, but tends to improve and preserve the butter.
